Hyundai vessels to temporarily call APM Terminals

Hyundai's regular PNW vessel will call APM Terminals for a limited time beginning July 1.

This temporary shift will allow Washington United Terminals to phase the Grand Alliance and ZIM business into the terminal's operations.

Containers will be trucked between APM Terminals to the North and South intermodal yards, adding considerable traffic near the Port's Administration Building on Sitcum Way.

Be alert and use caution when traveling in the area.

Traffic and drayage routes

During this temporary arrangement, we expect up to 500 truck trips a day on Sitcum Way between APM Terminals and Port intermodal yards.

Trucks will primarily move containers between APM Terminals and the North Intermodal Yard from 8 a.m. to 5 p.m. Monday through Friday, with the heaviest traffic volumes expected Tuesday, Wednesday and Thursday.

Increased truck traffic is also expected from 8 a.m. Tuesday to 3 a.m. Wednesday between APM Terminals and the South Intermodal Yard.

We also expect some truck and auto import traffic on the weekends.

The map on the other side of this flier shows the expected routes of trucks moving containers between APM Terminals and the Port's North and South intermodal yards.

Safety tips

- Remember this is a working port.
- Stop, look and listen when turning onto Sitcum Way to access the Port's Administration Building or Maintenance Building.
- Be alert and use caution as heavy equipment operators have limited sight lines and may not see your vehicle.
- Always yield to bigger vehicles.
- Eliminate distractions (radio, cell phone) when driving in the Port industrial area.
- If possible, avoid visiting the Port's Administration Building between 8 a.m. and 5 p.m. If you must come to the building, we encourage carpooling.
- Trucks "swing wide" when turning; trailers do not follow the path of the tractor.
- The speed limit on Sitcum Way is 25 miles per hour.

Contact information

For safety concerns, contact:

- Tom Brown, Port safety manager, at 253-383-9420
- APM Terminals operations at 253-680-4417 or 253-680-4464
